DETAILED ACTION

Response to Amendments / Arguments

Applicant's amendments have overcome the 112 and 103 rejections noted in the first office action.

The new claims are, therefore, allowable.

Drawings

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Applicant states the Fig. 1 and 2 show typical phosphate ore processing and feed preparation steps. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method of claims 15-50 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Applicant points out in the specification that the method of the present invention is performed during the phosphate ore desliming step. The method should be shown in a flow chart (i.e. the step of adding the surfactants, etc. must be shown). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 3653

Allowable Subject Matter

Claims 15-50 are allowed.
